

The quintessence of our products

Experience the ultimate in competitive cycling with the MARSHAL THEPUNSIHERV2. Featuring a sleek design and a luxurious finish, this frame is a technological marvel.

Crafted from ultra-light 6061 T6 aluminum alloy and featuring an aggressive geometry and a new horizontal tension chain tensioner, the MARSHAL THEPUNSIHERV2 is designed to give you the edge you need to dominate the competition.

Its unique masking process ensures a flawless finish.

Frame weight in PRO XL size = 1.890 Kg.

CHARACTERISTICS

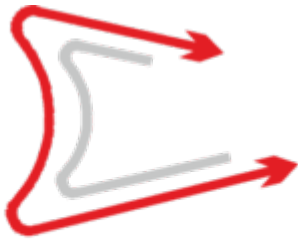

- Ultra-light construction: The 6061 T6 aluminum alloy offers an exceptional strength-to-weight ratio, ensuring maximum efficiency without compromising durability.
- Invisible welds: Our advanced polishing system creates a seamless finish, enhancing both aesthetics and structural integrity.
- Hydroformed top tube with integrated cable routing: The hydroformed top tube offers clean cable routing for a sleek appearance.
- "Big Base" "Best Resistance" seat tube: The reinforced seat tube provides exceptional durability and stability, even in the most demanding riding conditions.
- New rear dropout with rail system: The innovative rail system ensures millimetre-precise chain adjustment and compatibility with other connected modules, offering unparalleled versatility and adjustability.
- 100% disc brake compatible: Designed exclusively for disc brakes.
- Designed for Pressfit 86x92mm:

DROPOUTRAIL

S Y S T E M

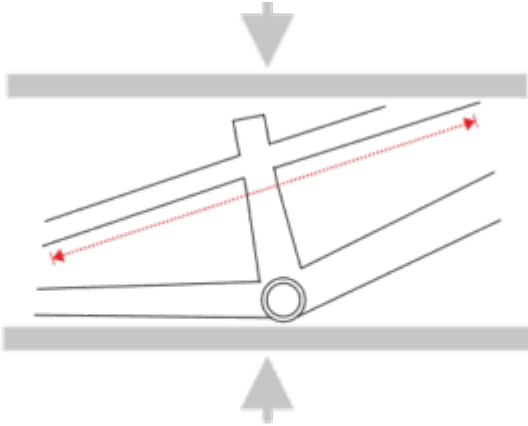

Our new rear dropouts feature an innovative rail system (DRS). DRS will allow you to connect various modules to your MARSHAL frame, such as our new chain tensioner, and our new GOPRO mount.

LATERAL STIFFNESS

S Y S T E M

The MARSHAL frame is equipped with a "STIFFNESS" rear reinforcement plate. This plate adds greater rigidity in lateral trajectories and focuses the energy generated by wheels and pedals.

SLOPING FRAME

T E C H N O L O G Y

The MARSHAL frame has the flattest geometry on the market, lowering its gravity center and providing greater rigidity and responsiveness... Adopt an exceptional frame, designed for BMX Racing.

INTERNAL CABLE

S Y S T E M

This system allows the passage of the brake-cable inside the top tube. It looks better and protects the frame from cable friction. Easy assembly consists of 2 plates.

HIDDEN**WELDING**

BY POLISHING PROCESS

Each MARSHAL frame undergoes a long and thorough polishing process to remove all weld marks. The result : the smoothest aluminum frame available.

READYCHAINTENSIONER

BY HORIZONTAL SYSTEM

Marshal Racing is proud to introduce our new horizontal-tension chain tensioner! This is the first front to rear sliding system, it will make adjusting the tension of your chain a lot easier. Our chain-tensioner will allow you to change your cogs without having to mess with the settings of your rear wheel! In addition, our chain tensioner is not attached the rear wheel and will remain in place when removing your wheel.

ALUMINUM

6061 T6

GREAT RESISTANCE

Our frame is made of 6061 T6 aluminum. We use hydroformed tubes to make a durable frame, and offer you unmatched weightless rigidity.

We designed our THE PUNISHER V2 frame in our Las Vegas - NEVADA offices. We have immersed ourselves in the origins of American BMX to offer you a strong design, at the root of our sport!... Since 2023, MARSHAL RACING is American
