LEGION Carbon EMPEROR Wheels: Lightweight, Performance, and Stiffness!

LEGION EMPEROR carbon wheels are engineered for demanding riders seeking the ultimate balance of weight and power. At a total weight of just 1820 grams, they offer the market's best ratio of strength, stiffness, and weight.

Key Features:

- Extreme Lightness: Featherweight design for explosive acceleration and optimal handling.
- Stiffness: The 27mm deep and 30mm wide profile ensures exceptional lateral stiffness for efficient power transfer.
- Durability: Toray 700 carbon guarantees rock-solid resistance, even in the most extreme racing conditions.
- Versatility: Compatible with BMX frames CRUISER and CRUIER XL, accommodating a wide range of tires (1.40″ to 2.00″).
- Customization: Available with a 20mm thru-axle (10mm adapter optional) and a disc brake system.
- Rapid Engagement: The rear hub features 180 points of engagement for immediate throttle-like responsiveness.

Wheel Specifications:

- Rims: Toray T700 Carbon, 27mm x 30mm profile, 36 holes.
- Spokes: Sapim® Lead drawn, 2.0mm straight gauge.
- LEGION EMPEROR Front Hub (color silver):
