LEGION Rims: The carbon look at an affordable price

Detailed description:

Give your BMX a racing look without breaking the bank with LEGION rims! Designed for demanding riders, these 6061 T6 aluminum rims combine lightness and strength.

Key features:

- Carbon design: A 28mm height and 28mm external width profile gives them a look similar to carbon rims, without the price tag.
- Versatility: Suitable for Mini to Expert XL BMX, they are compatible with 1-1/8 to 1-3/8 tires, offering a wide range of options to customize your bike.
- Performance: The 16mm internal width optimizes the profile of modern tires for better grip and increased comfort.
- Durability: 6061 T6 aluminum guarantees foolproof resistance, even in the most extreme conditions.
- Technical specs: 36 holes, Presta valve, without brake track.

Why choose LEGION rims?

- Unbeatable value for money: The carbon look at an affordable price.
- Versatility: Adapts to different riding styles and terrains.
- Performance: Improves grip and comfort.
- Durability: Built to last.

In summary:

LEGION rims are the ideal choice for riders looking for a modern, high-performance look without breaking the bank.

Whether you are an experienced rider or a beginner, these rims will bring you complete satisfaction.
